Overcoming Errors in Thinking
Part I, Part II, and Part III

I

tacting with convicted felons in a state correctional facility, Dr. Stanton E. Samenow, Ph.D, skillfully allows these men and women to take center stage and become the heart of this dynamic program. Thinking errors are revealed in vivid and dramatic encounters between inmates. Students and staff in many settings will discover direct, personal applications; it is far easier to recognize and debate the errors of people on the screen prior to considering your own.

Tactics: Habits That Block Change
Part IV, Part V, and Part VI

Correcting errors in thinking is first. The other half is the behavior that results from these thoughts. TACTICS are habitual ways of acting that keep people stuck in destructive lives. Tactics are ways to take control and build walls to shut out those who would help us. They block the most crucial step in change: looking at ourselves. When clients become aware of tactics and how they use them, change becomes possible. For staff, the leader’s guide provides a fuller understanding of these tactics and opens the way for greater effectiveness.

Samenow and Ed Roberts, MA, teach viewers how the Power of Consequences is a compelling motivation to stick with the difficult, day-by-day work of changing lifelong patterns. The group looks at the consequences of their past action, and they come to realize that before they acted, there was actually a moment of decision.
